

WHAT IS CLAIMED IS:

1. A pharmaceutical combination useful to treat, or to inhibit the onset of, a medical condition, disorder or disease for which treatment with GLP-2 is indicated, the combination comprising a GLP-2 activity enhancer and a GLP-1 activity inhibitor.
2. A pharmaceutical combination according to claim 1, wherein said GLP-2 activity enhancer is a GLP-2 receptor agonist.
3. A pharmaceutical combination according to claim 2, wherein said GLP-2 receptor agonist is human Gly2GLP-2.
4. A pharmaceutical combination according to claim 1, wherein said GLP-1 activity inhibitor is a GLP-1 receptor antagonist.
5. A pharmaceutical combination according to claim 4, wherein said GLP-1 receptor antagonist is exendin(9-39).
6. A kit comprising a pharmaceutical combination as defined in claim 1, and instructions for the use thereof in treating or preventing the onset of said medical condition, disorder or disease.
7. A method of medical treatment useful to treat or to inhibit the onset of a medical condition, disorder or disease for which treatment by GLP-2 is indicated, the method comprising the step of administering to the subject in need thereof a pharmaceutical combination as defined in claim 1.
8. A method for treating or inhibiting the onset of a condition, disorder or disease of the gastrointestinal tract, comprising administering

to a subject in need thereof a pharmaceutical combination as defined in claim 1.

9. A method according to claim 8, wherein said subject is afflicted with or at risk of developing a condition selected from mucositis, IBD, Crohn's disease and small bowel syndrome.

10. A method for treating a subject to suppress appetite, comprising administering to the subject an effective amount of a pharmaceutical combination according to claim 1.

11. A method for treating a subject to suppress appetite according to claim 10, wherein said subject is an obese subject.
